RAL POLYESTER POWDER COAT COLOR

The Architectural Brands have united to offer RAL CLASSIC* colors as standard. RAL is recognized as one of the most popular color standards used in our industry with over 200 colors available. We are confident these selections will provide an additional complement to our existing standard finishes to meet most opportunities.

The electrostatically applied/oven baked polyester powder coat process provides a very durable finish with great reliability for both interior and exterior applications. The colors are representative of a polyester TGIC formula to enhance the weather-resistance of the finish. All featured colors are available smooth or textured. For the smooth finishes, a gloss level can be selected from either a high gloss (level 85+), semi-gloss (level 30-40), or matte (level less than 30) finish. (Gloss level according to Gardner 60 deg., ASTM D 523).

To order a RAL finish, call out the color, texture and gloss level per the guide below:

RALxxxxF = flat matte (less than 15 gloss level)

RALxxxxM = smooth matte (less than 30 gloss level)

RALxxxSG = smooth semi-gloss (30-40 gloss level)

RALxxxxG = smooth gloss (85+ gloss level)

RALxxxxT = textured (20-40 gloss level)

Example:

To order RAL6005 Moss Green in smooth glossy finish, add RAL6005G in finish designation area.

EGCM1L LLP 16FT MSL8 80CRI 35K I1300LMF MIN1 ZT 277 SCT F2/72A **RAL6005G**

Projects where a RAL number is selected will be activated to the factory as a standard product. Colors will be ordered to the definition and standardization of the color shades represented. It is recommended that Hydrel products only use textured paint.

Use RAL TBD as a wildcard to validate pricing on quotations. Please be sure to specify the actual color at the time of order.

NOTE: These colors were carefully reproduced to give as true a depiction as possible of finished product color. Some colors, however, may vary slightly from actual appearance due to printing variations and limitations. This document should not serve as a standard for RAL color production and should be a guide only.

* RAL colors that are not shown on this brochure will be processed as custom paint and a paint chip will be required. Please see the custom paint process available on the [Acuity Brands web site](https://www.acuitybrands.com/resources/customer-tools/paint-colors) (<https://www.acuitybrands.com/resources/customer-tools/paint-colors>). Metallic colors are not available under RAL or custom paint processes.
